Subject: West Lake: question from PRPs on PRP-EPA-USGS groundwater meeting

Bob, Jeff, the PRPs have asked this several times lately. I do not see this as a good use of John's time; the PRPs have been responsive to all his requests for data (either by providing it or telling him the data doesn't exist) during his preparation of the USGS background/hydrology report. I'd rather not distract USGS from getting that report to us in a timely manner.

Principles and integrity are expensive, but they are among the very few things worth having.

Subject: Groundwater meeting

Dan,
We discussed the possibility of having a joint meeting with USGS, EPA and the PRPs to discuss the forthcoming groundwater reports to be issued by the PRPs and USGS. Is that something EPA is interest in pursuing? I think it would be very useful to evaluate potential data gaps that we might fill for USGS, based on conversations we've had with John Schumacher. We would also be very interested in John's thoughts on the conceptual model for the site. What do you think?
